FEED GRAINS, WHEAT AND SOYBEAN STOCKS BELOW A YEAR EARLIER, RYE AND FLAXSEED UP SHARPLY

Stocks of the four feed grains (corn, oats, barley and sorghum) on January 1, 1971, totaled 145.7 million tons. This is 12 percent less than the 164.7 million tons a year earlier, and lowest for the date since 1967. Oats showed a slight increase from last year, but other feed grains were down sharply.

Total stocks of wheat were 8 percent less than a year earlier, with durum stocks 19 percent less. Holdings of soybeans were down 10 percent from last year. Rye stocks were up 37 percent and flaxseed slightly more than a fourth larger than a year earlier.

All wheat in storage January 1, 1971, totaled 1,417 million bushels, 8 percent less than a year earlier, but 5 percent above the January 1, 1969, stocks. Off-farm stocks of 883.7 million bushels were 4 percent less than a year earlier, and farm holdings, at 533.7 million, were 13 percent below the record large total of a year earlier. Disappearance from all storage positions October through December is indicated at 380 million bushels, compared with 341 million a year earlier.

The Commodity Credit Corporation owned 283 million bushels of the total wheat stocks, and had loans outstanding on 477 million more.

Durum wheat stocks in all positions on January 1, 1971, totaled 90.2 million bushels, 19 percent less than a year earlier, but 5 percent above two years earlier. Farm holdings of 65.4 million were 28 percent below last year, but off-farm stocks of 24.8 million bushels were up 22 percent. Disappearance during October-December is indicated at 14.3 million bushels, compared with 18.5 million a year earlier.

Rye stocks in all storage positions on January 1, 1971, totaled 40.8 million bushels, the highest for the quarter since 1944 and 37 percent more than a year earlier. Off-farm stocks at 26.0 million bushels were 39 percent more than a year earlier, and farm stocks were up 34 percent. Indicated disappearance during October-December was 8.3 million bushels compared with 8.5 million a year earlier. The Commodity Credit Corporation owned 17.6 million bushels of the total rye stocks and had loans outstanding on 8.2 million.

Corn stocks in all storage positions on January 1, 1971, totaled 3,742 million bushels--down 13 percent from a year earlier--the smallest for the date since 1967. Off-farm stocks of 1,012 million bushels were 2 percent more than a year earlier, but farm holdings, at 2,730 million bushels, were down 18 percent. Indicated disappearance from all positions during October-December totaled 1,367 million bushels, compared with 1,380 million bushels a year earlier. The Commodity Credit Corporation owned 215 million bushels and had loans outstanding on 454 million more bushels.

Oats stored in all positions on January 1, 1971, totaled 914 million bushels--3 percent more than a year earlier, and 17 percent above January 1, 1969. Off-farm stocks accounted for 210 million bushels, up sharply from the 161 million bushels held a year earlier. However, farm holdings of 704 million bushels were down 3 percent from last year's 724 million bushels. Disappearance from October through December was 184 million bushels compared with only 139 million a year ago because of larger exports and heavier feeding of oats. The Commodity Credit Corporation owned 146 million bushels and had loans outstanding on 235 million more bushels.

Barley in storage January 1, 1971, totaled 381 million bushels, 11 percent below a year earlier but nearly 3 percent above January 1, 1969. Farm holdings, at 239 million bushels, were 10 percent below January 1, 1970, and 4 percent below January 1, 1969. Off-farm stocks, at 142 million bushels, were 12 percent below January 1, 1970. Disappearance from all storage positions October through December was 108 million bushels, 30 million above a year earlier. The Commodity Credit Corporation owned nearly 28 million bushels of the total and had loans outstanding on 100 million more bushels.

Sorghum grain stored in all positions on January 1, 1971, totaled 614 million bushels, 12 percent less than a year earlier. Both the on-farm and off-farm stocks were sharply below a year ago. Farm stocks, at 155 million bushels, were down 19 percent, and the off-farm stocks, at 459 million bushels, were down 9 percent.

January 1 stocks indicate an October-December disappearance of 328 million bushels--down slightly from the 341 million bushels for the same quarter a year ago, but up sharply from the 284 million bushels in the same quarter of 1968.

The Commodity Credit Corporation owned 163 million bushels of the total sorghum grain stocks and had loans outstanding on 43 million more bushels.

1/ Off-farm total plus farm stocks. October 1969 through October 1970 revised.

Flaxseed stocks in all storage positions on January 1, 1971 totaled 39.9 million bushels--26 percent more than a year earlier. Flaxseed stored off the farm, at 28.4 million bushels, accounted for 71 percent of the total stocks and was 52 percent above January 1, 1970. Farm stocks totaled 11.5 million bushels, 12 percent below a year earlier.

Current stocks indicate a disappearance during October-December of 3.7 million bushels compared with 7.6 million bushels in the same quarter last year. Disappearance during the last half of 1970 is indicated at 11.9 million bushels from a supply of 51.8 million bushels (carryover of 21.8 million bushels plus 1970 production of 30.0 million bushels. Reported disappearance for this 6-month period included about 8.0 million bushels crushed and 2.8 million exported).

The Commodity Credit Corporation owned 19.1 million bushels, and had loans outstanding on an additional 8.9 million.

Soybeans: Soybeans in storage on January 1, 1971 totaled 949 million bushels, 10 percent less than a year earlier. Farm stocks at 396 million bushels were up 7 percent, but off-farm stocks at 553 million bushels were down 19 percent from a year earlier. The Commodity Credit Corporation owned 80 million bushels and had outstanding loans on another 144 million bushels.

Stocks on January 1, 1971 indicate a disappearance during the 1970 September-December period of 416 million bushels from a supply of 1,366 million bushels (carryover of 230 million bushels plus 1970 production of 1,136 million bushels), compared with a disappearance of 396 million bushels a year earlier. During the past four months, approximately 251 million bushels were processed for oil and about 164 million bushels were exported.

Off-Farm Grain Storage Capacity

Capacity of off-farm commercial grain storage in the United States was 5,703 million bushels on January 1, 1971--66 million bushels more than a year earlier. Off-farm storage capacity generally increased in 1970 in most States.

Both increases and decreases, in most States, were small, although Illinois, Minnesota, Kansas and Washington each showed an increase of more than 10 million bushels. Largest gains were 24 million bushels in Illinois and 19 million in Kansas. There were small declines in New England, New York, Florida, Louisiana, Wyoming, Arizona and Nevada. Noticeable declines were in Nebraska, over 19 million bushels and in Texas, down 35 million bushels. Texas continues to rank first, and Kansas second in off-farm storage; together they equal 28 percent of the U. S. total. Over 31 percent of the Nation's total is accounted for by the next four--Illinois, Nebraska, Iowa and Minnesota.

Capacity data, by States, include all elevators, warehouses, terminals, merchant mills, other storages and oilseed crushers which store grain, flaxseed or soybeans. Capacity data exclude CCC bins, warehouses used to store only rice or peanuts, oilseed crushers processing only cottonseed or peanuts, tobacco warehouses, seed warehouses, and storages that handle only dry beans or peas.
